WORK EXPERIENCE

Backend Developer - Freelance

API Artemisa con vistas en handlebars

- Developed REST APIs with Node.js and Express for e-commerce and SaaS platforms.
- Implemented JWT and OAuth2 authentication in multiple applications.
- Payment integration with MercadoPago API in an e-commerce platform.
- Optimized MongoDB queries and improved database structure.
- Currently hosted on a custom domain, deployed with Vercel, and using MongoDB.
- Used Docker for development environments and automated testing with Jest and Supertest.

PROJECTS

Featured Projects

Artemisa E-commerce (Backend & Frontend)

- Developed an e-commerce platform using Node.js, Express, and MongoDB. Implemented JWT authentication, shopping cart functionality, and payment processing via MercadoPago API. Deployed on Vercel + Firebase.

artemisa-pvc.com

Electricidad Pittana (Frontend only)

- Website for an automotive electrical workshop, developed with HTML, CSS, and Bootstrap to enhance online visibility.
- electricidad-pittana.netlify.app

EDUCATION

CoderHouse Fullstack

NOV 2023 - DIC 2024

Fullstack

- Graduated in the TOP 10 of the best students of the commission.

Backend Developer

NOV 2023 - JUN 2024

- Learning and applying technologies such as Nestjs, Handlebars, Swagger, Logger, JWT, Node.js, Express and MongoDB.
- Final project: E-commerce platform with user authentication and shopping cart (Node.js, MongoDB, Express, Handlebars).

Frontend Developer

JUN 2024 - DIC 2024

- Learning and applying technologies such as HTML5, CSS3, JavaScript, React, Node.js, Express and MongoDB.
- Final project: E-commerce platform with user authentication and shopping cart (Node.js, MongoDB, Express, React).

Universidad Tecnológica Nacional

Electronic Engineering (Completed up to 3rd year, unfinished).

- I worked with C and C++ to program embedded systems, set up network communications, and develop IoT automation.

San Miguel High School - Hermanos Maristas

High School Diploma in Economic Sciences | Nogoyá, Entre Ríos, Argentina

“

Professional Summary

Full-stack developer with experience in Node.js and Express, knowledge in REST API development and optimization, and NoSQL database management (MongoDB, Firebase). Implementation of secure authentication (JWT, OAuth2, bcrypt) and integration of payment gateways such as MercadoPago. Proficiency in Docker for development environments and experience in automated testing with Supertest and Jest. I stand out for my ability to optimize code, improve response times, and apply agile methodologies (Kanban, Agile) to maximize productivity.

TECHNICAL SKILLS

- Backend: Node.js, Express, Nest.js, WebSockets.
- Databases: MongoDB, Firebase.
- Security: JWT, OAuth2, bcrypt.
- DevOps & Deployment: Docker, Vercel, Firebase.
- Tools: Swagger, Jest, Supertest.
- Methodologies: Agile, Kanban.
- Frontend: React.js, Astro, Tailwind.
- Current Learning: TypeScript, Microservices Architecture.

SOFT SKILLS

- Resolución de problemas → I detected slow queries in a MongoDB database. By optimizing indexes and refining queries, I significantly improved response times and system efficiency.
- Autogestión y productividad → I used Kanban and weekly sprints in the development of an e-commerce platform, organizing tasks and automating tests. This allowed me to meet deadlines without compromising quality.
- Comunicación efectiva → I collaborated with a non-technical client, translating their ideas into clear requirements using wireframes and regular meetings, ensuring the final product met their expectations.

LANGUAGES

- Spanish: Native.
- English: Intermediate B1 (Studying for B2 certification).
